Project Status Update
For
Wyle Laboratories Norco Facility Site
July 26, 2004

SITE INVESTIGATION/CLEANUP DOCUMENTS

- DTSC continued its review of the draft Boundary Assessment Report. DTSC intends to issue comments on the report next week.
- DTSC received and is reviewing effluent water sampling data from the groundwater treatment system.
- DTSC received a draft schedule for conducting an interim remedial measure. The interim measure is to address contamination in soil gas near Wyle's northwestern property boundary. DTSC will review the schedule and require modifications, if necessary.
- DTSC received an updated master project schedule. The schedule is the updated version of the March 31, 2004 schedule. The schedule includes timelines for site-wide investigation and cleanup. DTSC will review the schedule and require modifications, if necessary.

INVESTIGATION/CLEANUP FIELD WORK

- Groundwater cleanup system operation is ongoing.

PUBLIC PARTICIPATION:

- In response to concerns raised at the last public meeting, DTSC visited properties where residents indicated that groundwater surfaces ("groundwater springs"). DTSC is currently evaluating all concerns raised by the public with respect to potential offsite contamination.
- DTSC is arranging for a public meeting in August. It appears that August 16th will be the new meeting date. More information to follow.
- DTSC attended the City Council meeting and reported on the status of the Wyle project.
